Article Guidance**Article Text**

This Billing and Coding Article provides billing and coding guidance for Local Coverage Determination (LCD) L33923, Noninvasive Ear or Pulse Oximetry For **Oxygen** Saturation. Please refer to the LCD for reasonable and necessary requirements.

Coding Guidance

Notice: It is not appropriate to bill Medicare for services that are not covered (as described by the entire LCD) as if they are covered. When billing for non-covered services, use the appropriate modifier.

Procedure codes 94760 and 94761 represent services that have a T-status indicator. Therefore, if any other services payable under the physician fee schedule are billed on the same date by the same provider, this service is bundled into the physician services for which payment is made.

Documentation Requirements

1. All documentation must be maintained in the patient's medical record and made available to the contractor upon request.
2. Every page of the record must be legible and include appropriate patient identification information (e.g., complete name, dates of service[s]). The documentation must include the legible signature of the physician or non-physician practitioner responsible for and providing the care to the patient.
3. The submitted medical record must support the use of the selected ICD-10-CM code(s). The submitted CPT/HCPCS code must describe the service performed.
4. Medical record documentation maintained by the ordering/referring physician (e.g., office/progress notes) must indicate the medical necessity for performing ear or pulse oximetry studies. Additionally, a copy of the study results should be maintained in the medical records.
5. If the provider of oximetry studies is other than the ordering/referring physician, that provider must maintain hard copy documentation of test results and interpretation along with copies of the ordering/referring physician's order for the study. The ordering/referring physician must state the clinical indication/medical necessity for the oximetry study in the order for the test.

Bill Type Codes

Contractors may specify Bill Types to help providers identify those Bill Types typically used to report this service. Absence of a Bill Type does not guarantee that the article does not apply to that Bill Type. Complete absence of all Bill Types indicates that coverage is not influenced by Bill Type and the article should be assumed to apply equally to all claims.
