1

Effective Date of this Version

This is a longstanding national coverage determination. The effective date of this version has not been posted.

Ending Effective Date of this Version

12/18/2014

Description Information

Benefit Category

Prosthetic Devices

Please Note: This may not be an exhaustive list of all applicable Medicare benefit categories for this item or service.

Indications and Limitations of Coverage

Implantation of the carotid sinus nerve stimulator is indicated for relief of angina pectoris in carefully selected patients who are refractory to medical therapy and who after undergoing coronary angiography study either are poor candidates for or refuse to have coronary

bypass surgery. In such cases, Medicare reimbursement may be made for this device and for the related services required for its implantation.

However, the use of the carotid sinus nerve stimulator in the treatment of paroxysmal supraventricular tachycardia is considered investigational and is not in common use by the medical community. The device and related services in such cases cannot be considered as reasonable and necessary for the treatment of an illness or injury or to improve the functioning of a malformed body member as required by §1862(a)(1) of the Act.
