Description Information

Benefit Category

Incident to a physician's professional Service

Inpatient Hospital Services

Physicians' Services

Please Note: This may not be an exhaustive list of all applicable Medicare benefit categories for this item or service.

Item/Service Description**A. General**

Acupuncture is the selection and manipulation of specific acupuncture points by a variety of needling and non-needling techniques.

Indications and Limitations of Coverage

B. Nationally Covered Indications

N/A for acupuncture for fibromyalgia.

C. Nationally Non-Covered Indications

Effective for claims with dates of service on and after April 16, 2004, after careful reconsideration of its initial non-coverage determination for acupuncture, the Centers for Medicare & Medicaid Services (CMS) concludes that there is no convincing evidence for the use of acupuncture for pain relief in patients with fibromyalgia. Study design flaws presently prohibit assessing acupuncture's utility for improving health outcomes. Accordingly, CMS determines that acupuncture is not considered reasonable and necessary for the treatment of fibromyalgia within the meaning of §1862(a)(1) of the Social Security Act, and the national non-coverage determination for acupuncture for fibromyalgia continues.

D. Other

N/A

(This NCD last reviewed April 2004.)
